

NCMS saw a need to provide a structured preparation program for candidates planning to take the Industrial Security Professional (ISP®) certification exam because they found self-study difficult or impractical. In 2005, NCMS created the Exam Preparation program (EPP).

This program does not provide “answers” to the (ISP®) examination questions. Rather, it provides a structured approach to studying, a platform for discussion that will assist the candidate in confirming the accuracy of their knowledge, and general test-taking tips.

This program falls under the NCMS Education & Training committee.

Exam Preparation Program (EPP)

Purpose

The purpose of the EPP is two-fold:

1. Prepare ISP[®] exam candidates to pass the exam by offering a comprehensive course of study focusing on the NISPOM and other industrial security policies and regulations.
2. Increase professionalism of industrial security practitioners in general.

**IT'S TIME
TO KNOCK OUT
YOUR ISP!**

Goals

Our goal is the same as yours – obtaining your ISP[®] !

To do this, we have created internal objectives to ensure we are providing you the most beneficial assistance possible. These include:

1. Improve the understanding of the NISPOM and other subject matter areas covered by the exam among security professionals, whether or not they intend to test for the ISP[®] certification.
2. Assist candidates who did not pass the ISP[®] certification exam on their first attempt, so they can successfully retest.
3. Increase networking among candidates to buildup their confidence on test day and in working with colleagues on both industrial security and Society matters.

How It's Done

EPP participants are provided weekly assignments from the EPP Workbook and are asked to complete those assignments prior to their weekly WebEx session.

Participants attend weekly sessions where the assignments are discussed, correct responses are provided and questions referencing the material are answered.

These WebEx sessions are facilitated by ISP[®]s who have been carefully selected by the EPP leadership to ensure they can provide participants with the best assistance on the assigned subject matter.
