Recertification Tips

As an ISP® you must recertify every three years. Below are some program requirements that you must keep in mind to make recertification as painless as possible.

- Submission:** Your recertification application and supporting data is due the last day of the month in which you are required to recertify, and it can be submitted no earlier than six months in advance. You are responsible to ensure that your recertification package reaches NCMS HQ by the due date. The NCMS Executive Director will contact you if there are any questions or additional documentation needed with your recertification application. You must respond in a timely manner to questions or requests for additional supporting data. **Note: Failure to submit a completed application, payment, and ALL supporting documentation more than 30 days after your recertification due date will result in a lapse in your certification.**

Document Number: ISP - 4044 Revision Date: October 2018 Version: 1.3

ISP® Recertification Checklist

It is highly recommended that the ISP® recertification candidate begin preparing for recertification once you become certified or your recertification is final. A recertification is required every three (3) years. Don't wait until the end of the 3rd year to start obtaining Continuing Education Units (CEUs), gather your support documentation, and/or research CEUs attained.

Begin information collection and metric consolidation right after initial certification and recertification, thereby always knowing how many additional credits are needed. This checklist is optional and is not included with your Recertification Application submission package; it is merely a tool to assist in attaining recertification and preclude a rejected package.
